

# Decorative Surrounds

Chemcrest's offering of decorative surrounds for interior use includes its NEW Door Toppers as well as an extensive line of square stone textured plaques (or, as we're calling them here - "Square Medallions"). As with any of Chemcrest's fifteen hundred standard products, the applications for these items are only limited by your imagination.

Polyurethane products are easy to work with and are cut and installed much like a wood product. They can also be painted with either a quality latex or an oil based paint following the directions on the container - or polyurethane products can be faux finished for an entirely unique look that's all your own. Use Chemcrest's Decorative Surrounds as suggested here or dream up something entirely new.

**ARCHITACT**

Always remember to use ArchiTact™ polyurethane-based adhesive on all joints when installing molding and trim.

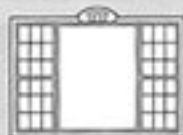

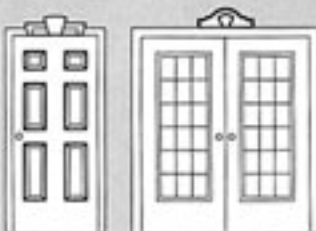

Spread ArchiTact™ Adhesive evenly over the surface area that will be bonded to the wall. Ensure products are clean and dry before application.

New from Chemcrest - Door Toppers may be used above single and double doorways as a crowning jewel in interior or exterior settings. Or they may be used above windows - or perhaps below windows as a sill decoration.

Door Toppers are easy to work with as they can be adhered to walls using Chemcrest's ArchiTact™ adhesive and finishing nails. Casing around doors or windows can be cut to join to the Door Toppers. Or for an easier installation or a renovation - simply position the Door Topper above the casing.

Here are a few suggestions for Door Topper applications:

# Decorative Surrounds

Chemcrest FP5348 Fireplace Surround may be stained after installation to make it look like real Oak. (see page 16).

**Door Plantons**

Item	W	H
