

Brackets, Corbels & Stair Brackets

A well designed home has all the details covered. And that includes the small jewels of architectural details such as wall brackets and corbels and decorative stair brackets. Chemcrest offers an extensive line of brackets and corbels that can be used on their own or combined with moldings and mantles around ceilings, fireplace surrounds or incorporated into kitchen cabinetry. And now Chemcrest introduces a series of stair brackets which may be incorporated into virtually any stair case design to beautifully enhance a stair wall. Chemcrest brackets, corbels and stair brackets are easy to install and may be painted or faux finished to further adorn a room.

Brackets are a wonderfully versatile detail that may be used alone or in combination with other items. Consider these ideas:

- one larger bracket adhered to a wall used as a small decorative shelf
- two brackets positioned a couple of feet apart with a glass shelf resting upon them
- two brackets pre-drilled to receive a curtain rod to act as adornments to drapery
- one or two brackets positioned inside or beside a door or archway to create a more dramatic entry
- incorporate brackets into fireplace surrounds as decoration under mantles
- incorporate brackets into kitchen cabinet designs to dress up cupboard settings
- design your own unique bracket application
